# Purchase A Genesis, Ultra, or VirTual Freeze Dryer

**Genesis Freeze Dryer**

Unmatched for capabilities and price, Genesis allows you to select the latest in data monitoring and automation. This makes it ideal for scale-up from research to pilot scale production.

An expanded range of shelf arrangements and condenser capacities lets you configure to your exact load requirements.

Our Wizard controller gives you LCD display of data, generated from product- or shelf-driven freeze-drying cycles. Full recipe management allows for a precisely controlled process.

**Ultra Freeze Dryer**

The Ultra Series Freeze Dryers are customized for your exact processing needs. They offer expanded capabilities with over 50 user-friendly configurations to choose from.

Dramatically increased shelf area and clearance; new latching capability for larger vials; and advanced, easy-to-use processing control systems and internal condenser are just some of the newest innovations to this freeze dryer series.

**VirTual Freeze Dryer**

The VirTual Freeze Dryer is ideal for product development and small production requirements where a large vapor load is delivered quickly to the condenser. The new series is available with our water cooled Super EL refrigeration system capable of -70°C shelf temperature and -90°C condenser temperature.

Complete process automation and validation documentation available.

## Receive Your Choice Of

### Trays

Choose from a variety of trays:

- Removable Bottom Tray
- Poly Bottom Tray
- Filter Seal Tray
- New Thermo Guard Tray
- Standard Bulk

All trays are constructed of 316 stainless steel.

4 Trays

**FREE**

### MVP Probes

- Wires are easily replaceable.
- Interchangeable with plugs currently in use on your VirTis Freeze Dryer, or any other.

- Easily replaces competitors difficult to use and expensive probes.
- VirTis MVP Probes are available in a variety of plug configurations:

- Standard Thermoplastic
- Steam Sterilizable
- Lemo Connector
- No Plug

4 Probes

**FREE**

### Latching Kit

4 shelves before latching

Become 2 shelves after latching

The shelf latching kit is used to latch shelves together, reducing the number of useable shelves and increasing the clearance between shelves to allow for lyophilizing in larger vials. Only for Genesis units equipped with stoppering. Latching kits included on all stoppering Ultras and VirTuals.

One Latching Kit

**FREE**

Offer expires September 30, 2002.
